

DR JAMES BENNETT

Executive Vice President, EOS Space Systems

Dr Bennett joined EOS Space Systems in 2011 and was appointed to the position of Executive Vice President in 2022, having previously worked as Vice President, Head of Technology Development and Astrodynamics Group Leader. Dr Bennett leads the development and commercialisation of core EOS' products and services for space domain intelligence and space control, including the development of next-generation surveillance and high energy laser systems.

He has also led key military space control programs and has over 10 years' experience in the delivery of complex space solutions including the Space Environment Management Program at the Space Environment Research Centre. Dr Bennett is a member of the International Laser Ranging Service Governing Board and actively leads EOS' contributions to global space activities.
